How to Call Forward an Extension to an External Telephone Number

You must first Program the telephone system to set which extensions have permission to do this.

Go into the Programming Mode at Extension 101

Go to Program 607

This where you determine which extensions are allowed to send their calls to an external number
Enable all jacks

Go to Program 963

This enables incoming CO calls to be forwarded back out on another CO Line to extensions that have CO Forward ability from Program 607
Enable all jacks

Go to Program 400

Make sure that only working CO Lines show as CONNECTED.

How to set an extension to forward its calls to an external number.

Go to the extension you want to forward.

Press the Intercom Button

Dial 7139 + the telephone number you want to send the calls to followed by a #. (POUND BUTTON)

Example to send a call to 1 212 235-1234

You would press the Intercom Button and dial 713912122351234#

To Cancel Call Forwarding to a CO Line:

Press the Intercom Button

Dial 710# (7 1 0 POUND)
